

# TotalColor

with/without  
**Easymedia**

**TotalColor is a complete ICC profile creation solution especially designed for flatbed and super wide format production printing businesses.**

The TotalColor is an automated device that works both for reflective and translucent media.

It's a complete solution for accurate color management and "on the mark" digital color output.

- » 3 measuring modes :  
automatic, single and density
- » Reads any kind of media  
(papers, vinyls, textiles...) including  
rigid materials up to 20 mm thick
- » Adjustable aperture 2 or 6 mm
- » Fast reading : 10 minutes for  
a 1248 patches chart
- » USB connection
- » *Optional : EasyMedia ,  
Caldera's profile creation software*
